PROFESSIONAL SUMMARY

BBA (Computer Application) graduate with hands-on experience in AWS Cloud, Linux, Docker, networking, security, monitoring, and application deployment. Familiar with Amazon EC2, S3, VPC, IAM, EBS, CloudWatch, SNS, RDS, CloudFront, Security Groups, and Elastic IP. Strong foundation in Java Backend Development using Java, Spring Boot, REST APIs, MySQL, and JWT authentication, along with Frontend Development using HTML, CSS, JavaScript, React.js, and Bootstrap. Currently building practical skills in DevOps, Git, GitHub, Docker, CI/CD, Terraform, Jenkins, and Kubernetes. Seeking an entry-level AWS Cloud Engineer, Cloud Support Engineer, DevOps Engineer, or Java Full Stack Developer role.

EDUCATION

ISB&M College of Commerce <i>BBA (Computer Application) – CGPA: 6.75 / Grade A</i>	2022 – 2025 Pune, Maharashtra
Lokseva E-School & Junior College <i>HSC – Commerce with Computer Science</i>	2020 – 2022 Pune, Maharashtra

EXPERIENCE

Mervice Infotech Pvt. Ltd. <i>Associate II – Operations</i>	May 2026 – Present Pune, Maharashtra
– Manage daily operational activities and coordinate with internal teams to ensure smooth business operations. – Handle application-related processes, issue tracking, reporting, and operational workflows. – Monitor assigned activities and maintain accurate records and daily operational reports. – Identify operational issues and coordinate with relevant teams for timely resolution. – Maintain process documentation and communicate effectively with cross-functional teams.	

PROJECTS

Java Spring Boot Application Deployment on AWS EC2	July – August 2026
– Tech Stack: Java, Spring Boot, REST API, MySQL, Docker, AWS EC2, VPC, IAM, Security Groups, Linux – Developed a RESTful backend application using Java and Spring Boot following a structured layered architecture. – Implemented REST APIs for application operations and integrated MySQL for persistent data storage. – Containerized the Spring Boot application using Docker and created reusable Docker images and containers. – Deployed the Dockerized application on an AWS EC2 Linux instance and configured Security Groups for application access. – Configured AWS VPC networking and inbound and outbound rules for secure application connectivity. – Used Linux commands to manage files, processes, services, disk space, ports, and troubleshoot deployment issues. – Tested application APIs and performed troubleshooting for container, port, connectivity, and deployment-related issues.	
AWS Static Website Hosting & Content Delivery	May 2026
– Tech Stack: Amazon S3, CloudFront, IAM, HTML, CSS, JavaScript – Designed and deployed a static website using Amazon S3 with bucket configuration and access policies. – Configured Amazon CloudFront distribution to deliver website content efficiently through a content delivery network. – Configured IAM permissions and S3 bucket policies to control access to AWS resources. – Worked with S3 storage, bucket configuration, public access settings, and CloudFront distribution settings.	
AWS Cloud Infrastructure Monitoring & Alerting	June 2026
– Tech Stack: Amazon EC2, CloudWatch, SNS, IAM, Linux – Configured Amazon EC2 infrastructure and monitored system performance using Amazon CloudWatch. – Created CloudWatch alarms to monitor CPU utilization and identify infrastructure performance issues. – Configured Amazon SNS notifications to receive alerts when monitoring thresholds were triggered. – Analyzed CloudWatch metrics and logs to identify resource utilization and potential infrastructure issues.	
Java Full Stack Billing Application	2025
– Tech Stack: Java, Spring Boot, REST APIs, React.js, JavaScript, MySQL, HTML, CSS – Developed a full-stack billing application using Spring Boot for backend services and React.js for the frontend. – Created REST APIs for customer, product, billing, and transaction-related operations. – Integrated MySQL database for storing and managing application data using SQL and CRUD operations. – Developed responsive frontend components using React.js, HTML, CSS, JavaScript, and Bootstrap. – Integrated frontend components with backend REST APIs and tested application functionality.	

TECHNICAL SKILLS

Cloud Technologies: AWS EC2, S3, VPC, IAM, CloudWatch, SNS, RDS, EBS, AMI, CloudFront, Security Groups, Elastic IP, Load Balancer, Target Groups

AWS Infrastructure: EC2 Deployment, VPC, Subnets, Route Tables, Internet Gateway, Security Groups, EBS, AMI, Elastic IP, Load Balancer, Target Groups

DevOps: Docker, Docker Images, Docker Containers, Git, GitHub, CI/CD Basics, Terraform, Jenkins, Kubernetes, Application Deployment, Bash/Shell Scripting

Linux: Linux Administration, File Management, User Management, Permissions, Processes, Services, Disk Management, Networking Commands, Troubleshooting

AWS Security: IAM Users, IAM Roles, IAM Policies, Bucket Policies, Security Groups, Least Privilege, Access Management

Monitoring: CloudWatch Metrics, CloudWatch Logs, CloudWatch Alarms, SNS Notifications, Infrastructure Monitoring

Java Backend: Java, Core Java, OOP, Collections, Exception Handling, Multithreading, Spring Boot, Spring MVC, REST APIs, RESTful Web Services, JWT Authentication, MySQL

Frontend Development: HTML5, CSS3, JavaScript, React.js, Bootstrap, Responsive Web Design, REST API Integration

Database: MySQL, SQL, Database Design, CRUD Operations, Joins, Subqueries

Programming Languages: Java, Python, JavaScript, PHP, C++

Version Control & Tools: Git, GitHub, Docker, MS Excel

Operating Systems: Linux, Windows

CERTIFICATIONS & TRAINING

AWS Cloud Training 2026
AWS Cloud Fundamentals, EC2, S3, VPC, IAM, CloudWatch, RDS, EBS, Security Groups and Cloud Infrastructure

Java Full Stack Developer – IT Vedant Feb. 2025 – Aug. 2025
Java, Spring Boot, REST APIs, SQL and Web Development

IBM Training
Java Programming, SQL Fundamentals, Web Designing

TCS iON Career Edge – Young Professional
Professional Skills and Career Development

CORE STRENGTHS

AWS Cloud		Cloud Troubleshooting		Linux		Docker		Git & GitHub		DevOps Basics		Java Backend	
React.js		Problem Solving		Application Deployment		Team Collaboration
